

Live BNN Video

Here is one experience that highlights the very best of GlobeinvestorGOLD.

Launch the GOLD Tracker Java Applet and view streaming quotes of your favourite stocks. Alongside these quotes, watch live, streaming video from the Business News Network (formerly ROBTv), the nation's most essential financial news channel.

Having quotes and video features embedded in the same tool gives investors an edge:

- While analysts, CEOs and fund managers discuss their firm or their top picks live on air, view news, quote information, and interactive charts on those stocks to evaluate their investment potential.
- React quickly to breaking news, such as merger talks, earnings upgrades and downgrades and supply shortages for your favourite commodity, as the stories break.
- Search the BNN archive by stock symbol or keyword to find Video on Demand and past interviews related to a company, topic or industry.
- View readily accessible video clips from the past five days to catch up on any programming you might have missed.
- Enlarge the viewing window to a customized size or expand to full screen.

And yes, long live Market Call, BNN's hugely popular phone-in show where fund managers shoot from the hip about firms with strong earning potential, unloved and overlooked gems, and the next new new thing.
