

## Introduction to GlobeinvestorGOLD

Managing your investments is not an easy task. To be successful, you need:

- News and tools that help you monitor your current investments
- A portfolio tracker that gives you precise measures of your return on investment
- Filters that can pinpoint specific stocks for purchase
- Advice and insight from experts you can trust
- A view of the markets from a Canadian perspective

The Globe and Mail's GlobeinvestorGOLD product provides all of these features and more. That's why we call it Canada's Ultimate Website for Canadian Investors. Take advantage of one of the best portfolio trackers on the Web – one that tracks your portfolio on a real time, daily, weekly, monthly and annual basis. Determine your true rate of return on a cash flow basis over any of these periods. Use advanced stock and fund filters to find the needle in a haystack that meets your investment goals. View detailed fund and stock profiles to get the skinny on a fund or company's performance. Receive automatic e-mail alerts informing you of price moves, news, and other information that could affect your investments.

And best of all, you get the unique insight of Globe and Mail columnists like Rob Carrick and Mathew Ingram, plus live and archived BNN (formerly ROBTV) streamed directly to your desktop.

For the very active investor, check out our real time Level 1 or Level 2 quotes for all North American equity and options exchanges.

GlobeinvestorGOLD is designed for Canadian investors who want the best system available to help them become successful investors.
